

Wavy -std/pro

Are You Troubled by ERP?

- I can't use it! There are too many functions and the operation is too complicated!
- It reduce neither hand work nor human errors.
- The annual support fees and operation costs are too high!
- One software can't cover our company operations!

**Trust
Wavy!**

Wavy is...

A windows-based ERP package developed on the concept of a product that allows anybody to easily and accurately use the basic functions supplied in ERP.
